HOMOGENEOUS COLOR BRILLIANCE

impress develops the perfect surface designs by means of decors and structures, to enable the design of furniture that closely reflects the individual concepts of life. In addition, we offer our customers matching uni colors for comprehensive interior design and color solutions. In order to produce these colors, we have perfected our printing technology to such an extent that we are now able to offer a portfolio of single-color printed paper

with overall homogeneous colors. We offer a wide range of the most significant trend-oriented colors. We are also happy to work with you to realize your individual ideas of color schemes. In quantities starting with one ton, our UNI SOLIDs can be delivered to you within a short delivery time.

- Uni colors matching our decors for comprehensive interior design and color solutions
- Single-color printed paper featuring homogeneous colors
- Trend colors form our color collections or the realization of individual color requests
- Delivery available for quantities starting with one ton
- Short delivery times

DECORS BY IMPRESS. MADE TO IMPRESS.

CHARACTERISTICS

UNI SOLID colors are printed, uni-colored decorative papers for coating wood-based materials. Through optimization in the printing process, very homogeneous color impressions are generated.

Impress UNI SOLID colors offer the possibility to realize trend colors from one ton order quantity in the shortest time. Our collection shows an extract of the available color spectrum. Further colors within the existing primary color series can be created in coordination with the customer.

We have made significant investments in our press and cylinders, ensuring exceptional performance. Our printing process is specially developed to deliver outstanding results, thanks to the perfect interaction of cylinders, inks and additives. One of our key advantages is the use of superior raw materials and base paper inks, which allows us to achieve color accuracy and minimize the white edge effect. Our prints exhibit no missing dots or printing marks, ensuring the highest level of homogeneity. As a result, our UNI SOLID colors offer distinct product advantages that set us apart from the competition in the printing industry.

TECHNICAL SPECIFICATIONS

BASE PAPER GRAMMAGE	> 65 gm ²
RECOMMENDED PROCESSING INSTRUCTIONS	The processing can be done on commercial LPL, HPL and CPL presses. Due to the high ink application, a slight asymmetric impregnation (increased resin application on the back) may be necessary. Should any questions occur, your impress contact person and application engineer will provide you with information and advice.
LIGHT FASTNESS	≥ 6 according to DIN EN15187 (BW-scale 200h)
COLOR TOLERANCE ΔE (2000)	0,6 +/- 0,1; according customer agreement
AIR PERMEABILITY	minimum 15 seconds - maximum 35 seconds according to Gurley
DELIVERY FORM	Rolled goods: ≥ 1 ton
STORAGE CONDITIONS	Keep in a dry and cool, well ventilated place. No special measures are required.
ENVIRONMENTAL COMPATIBILITY	Impress plants are FSC® certified
